WHAT IS
BUSINESS EMAIL COMPROMISE?

ILLEGAL ACCESS

Criminals gain access to a victim's device or systems through hacking, phishing websites, or malware - then deceive the victim into transferring money into their bank account.

SOCIAL ENGINEERING

Criminals can target their victims based on information they share on social media platforms. Be intentional when you share - or more importantly - do not share information via social media platforms.

URGENT REQUEST

Criminals' number one tool is deception. They will impersonate a supplier requesting an urgent payment, or change in banking details, or even a senior employee with access privledges to payment information.

#BECareful

Make sure you know how to identify, react and report to any suspicious emails. When in doubt, check with your IT administrator first before taking action.
