Location: 100% Remote position

Position Type: Full time/Permanent

Starting Date: As soon as possible

Onsite/Travel Required: Rare

Salary: Based on experience

Excellent Company Benefits Package 401k, Vacation/Holidays, Medical, Dental and Vision Insurance, Life Insurance, Employee Assistance Program and more

Who are we looking for?

We are looking for an experienced **Full Stack Web Developer** who wants to participate in a brownfield transformation of the existing LMS platform to modern technology in a small team.

This role would be responsible for developing new features as well as updating and maintaining current features.

Required

We're looking for all experience levels with hands-on development experience in an Agile environment, using some combination of:

- ASP.NET .NET Core MVC, API, REST
- ASP.NET .NET Framework C# MVC
- Javascript, including VueJS, JQuery, Knockout,
- CSS, including Bootstrap
- Visual Studio 2022, Visual Studio Code
- Azure Cloud Experience (App Service, Azure SQL, Serverless)
- Docker
- Relational Databases MS SQL
- Unit/Integration testing experience

Good object design skills

- Domain Driven Design
- SOLID
- Microservices architecture
- Event driven architectures

The candidate should be able to collaborate in Azure DevOps services

Other Skills - Preferred but not required

- User-Interface Design

- SCRUM
- E-Learning Industry Experience

Professional Aptitudes:

- You want to bring your experience to bear on an industry-leading platform where your influence makes an impact
- You want to be on a Development TEAM, not just part a group of developers in an office together
- You like learning new technologies, and want a role where you can apply a broad skill set
- You understand the business behind the software and how your code fits into the big picture
- You work tirelessly when having to find bugs in other people's code (and that way you know how not to make the same errors in yours)
